-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 3736

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 32, 40, 89 are rejected under 35 U.S.C. 102(b) as being anticipated by Sauerwein et al.

Sauerwein et al discloses an apparatus (See Figures 8-9) for advancing a radioactive source having a housing, a cassette with a radioactive source inside, the cassette (110) being removably coupled to the housing and a drive (122) for advancing the radioactive source from the cassette into a catheter (108), (see column 5, lines 29-50). Sauerwein et al also teaches that the drive means can either be in the treatment apparatus attached to the cassette or each cassette can have a drive means within the cassette (see column 5, lines 51-60).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 90 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sauerwein et al in view of Popowski et al.

Sauerwein et al discloses the claimed device except for the radioactive source being specifically a beta radiation. Popowski et al discloses a device for providing radiation

Art Unit: 3736

therapy to the body and teaches (column 4, line 62-column 5, line 21) that it is well known to use a beta radiation source to provide radiation therapy in the body and teaches why a beta source is preferred. Therefore a modification of Sauerwein et al such that the radioactive source is a beta radiation would have been obvious in view of the advantages of using a beta source as shown by Popowski et al that beta emitters are preferable used to treat within a body of a patient.

5. The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

The Declaration filed 07 June 2001 is defective in that on page 2 the Declaration refers to claims 42-112, however as discussed previously claims 92-112 do not exist.

6. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

7. In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 1-91 are rejected as being based upon a defective reissue Declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Art Unit: 3736

Receipt of an appropriate supplemental oath/declaration under 37 CFR

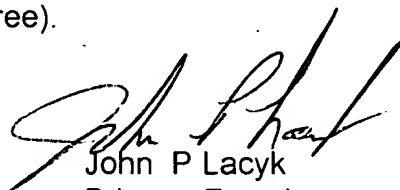

1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

"Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P Lacyk whose telephone number is 571-272-4728. The examiner can normally be reached on Mon-Fri, 8:30-5:00.
